GEL-COOL

Cooling gel is built in the lid.

"GEL-COOL" is the container with the lid which filled with cooling gel. Just leave the lid in the freezer over 6 hours then the lid works as ICE BAG. It keeps contents below 15°C in outside air temperature 25°C* for about 4 hours. Simple design doesn't occupy space so you can freeze the lid with no stress.

When contents are less than 5°C (Our test outcome)	outside air temperature	Keep contents below 15°C
	25°C	about 4 hours
	30°C	about 3 hours

*By the conditions of use, result might be different.

*In case of using dome S, result is below 20°C

*It is said breeding of bacteria becomes activated if temperature of foods in lunchbox is higher than 25°C.

*The result is only a guide. With using heat insulation effect bag, cooling effect continues more lengthily.

GEL-COOL collaborates with TOSA ancient cedar from Kochi prefecture. It's called "mWood" series. 2 type of lid, Wood lid and GEL-COOL lid, comes in one set. You can use whichever you want. "OJU" size comes as new item. It's very useful for picnic with parties or use at home party to entertain guests.

TOSA ancient cedar from Kochi

An ancient cedar which aged more than one hundred years can be good material for lunchbox. Because it has less risk of changing shape by humidity or aridity. It's said, woods live over 100 years, it can live 100 years after hewing down. You can see a lot of architectural structure which made from ancient wood. They still stand even if long time has passed. The ancient wood has life so function of humidity control still works even if wood shaped to lunchbox. Feel a bit of scent of wood with lunchbox.

MARUYAMA ZOO

Cute "GEL-COOma series" has excellent usability. Various products like lunchboxes, mug bottles and bag are available. A fan of cooma is increasing rapidly nationwide!

We want to protect a polar bear. "GEL-COOma" was born from the thought. Sapporo Maruyama zoo in Sapporo-shi, Hokkaido is not only citizen's oasis but one of the zoos which succeeded polar bear breeding. There are few zoos which succeeded to breeding and bringing up polar bear because it's not easy. We donate a part of sales of "GEL-COOma" series as bait charges of the polar bear to support Sapporo Maruyama Zoo performing various actions for species preservation. We hope that people having "GEL-COOma" series feel preciousness of a polar bear.
